

ELSEVIER

Applied Catalysis A: General 133 (1995) 377–378

Author Index

- Balladur, V., Fouilloux, P. and De Bellefon, C.
Monometallic Ni, Co and Ru, and bimetallic NiCr,
NiTi and CoFe Ziegler–Sloan–Laporte catalysts
for the hydrogenation of adiponitrile into
hexamethylenediamine: Effect of water and
dopants 367
- Barbier, J., see Pieck, C.L. 281
- Benhamou, N., see Labalme, V. 351
- Besson, M., see Fordham, P. 179
- Blekkann, E.A., see Ledoux, M.J. 321
- Cambor, M.A., Constantini, M., Corma, A.,
Esteve, P., Gilbert, L., Martinez, A. and
Valencia, S.
A new highly efficient method for the synthesis of
Ti–Beta zeolite oxidation catalyst 185
- Cavani, F. and Trifirò, F.
Alternative processes for the production of
styrene 219
- Chang, L., see Li, Y. 293
- Chao, Z.S., see Zhou, X.P. 263
- Constantini, M., see Cambor, M.A. 185
- Corma, A., see Cambor, M.A. 185
- Datye, A.K., see Kalakkad, D.S. 335
- De Bellefon, C., see Balladur, V. 367
- Esteve, P., see Cambor, M.A. 185
- Fordham, P., Besson, M. and Gallezot, P.
Selective catalytic oxidation of glyceric acid to
tartronic and hydroxypyruvic acids 179
- Fouilloux, P., see Balladur, V. 367
- Gallezot, P., see Fordham, P. 179
- Garbowski, E., see Labalme, V. 351
- Gilbert, L., see Cambor, M.A. 185
- Guilhaume, N., see Labalme, V. 351
- Huang, Y., see Long, R. 269
- Jackson, N., see Kalakkad, D.S. 335
- Ji, T., see Xiao, F.-S. 305
- Kalakkad, D.S., Shroff, M.D., Köhler, S.,
Jackson, N. and Datye, A.K.
Attrition of precipitated iron Fischer–Tropsch
catalysts 335
- Köhler, S., see Kalakkad, D.S. 335
- Labalme, V., Benhamou, N., Guilhaume, N.,
Garbowski, E. and Primet, M.
Modifications of Pt/alumina combustion catalysts
by barium addition I. Properties of fresh
catalysts 351
- Ledoux, M.J., Peter, A., Blekkann, E.A. and Luck, F.
The role of the nature and the purity of the alumina
support on the hydrodesulfurization activity of
CoMo sulfides 321
- Li, Y., Wang, R., Yu, J., Zhang, J. and Chang, L.
Effect of abnormal treatment on the mechanical
strength of iron-based high-temperature shift
catalyst 293
- Long, R., Zhou, S., Huang, Y., Weng, W., Wan, H.
and Tsai, K.
Promoting effect of F⁻ on Sr/La oxide catalysts
for the oxidative coupling of methane 269
- Luck, F., see Ledoux, M.J. 321
- Luo, J.Z., see Zhou, X.P. 263
- Marecot, P., see Pieck, C.L. 281
- Martinez, A., see Cambor, M.A. 185
- Meng, X., see Xiao, F.-S. 305
- Numaguchi, T., Shoji, K. and Yoshida, S.
Hydrogen effect on α -Al₂O₃ supported Ni catalyst
for steam methane reforming reaction 241
- Okazaki, S., see Tanabe, K. 191
- Pang, G., see Xiao, F.-S. 305
- Pang, W., see Xiao, F.-S. 305
- Parera, J.M., see Pieck, C.L. 281
- Peter, A., see Ledoux, M.J. 321
- Pieck, C.L., Marecot, P., Querini, C.A., Parera, J.M.
and Barbier, J.
Influence of Pt–Re interaction on activity and
selectivity of reforming catalysts 281
- Primet, M., see Labalme, V. 351
- Querini, C.A., see Pieck, C.L. 281
- Shoji, K., see Numaguchi, T. 241
- Shroff, M.D., see Kalakkad, D.S. 335
- Tanabe, K. and Okazaki, S.
Various reactions catalyzed by niobium
compounds and materials 191
- Trifirò, F., see Cavani, F. 219
- Tsai, K., see Long, R. 269
- Tsai, K.R., see Zhou, X.P. 263
- Valencia, S., see Cambor, M.A. 185
- Wan, H., see Long, R. 269
- Wan, H.L., see Zhou, X.P. 263

- Wang, R., see Li, Y. 293
Weng, W., see Long, R. 269
Xiao, F.-S., Pang, G., Ji, T., Meng, X., Pang, W. and Xu, R.
Catalytic cracking activity and physicochemical properties of REY zeolite mixed with kaolin clay treated by hydrothermal hot pressing method 305
Xu, R., see Xiao, F.-S. 305
Yoshida, S., see Numaguchi, T. 241
Yu, J., see Li, Y. 293
Zhang, J., see Li, Y. 293
Zhou, S., see Long, R. 269
Zhou, X.P., Chao, Z.S., Luo, J.Z., Wan, H.L. and Tsai, K.R.
Oxidative dehydrogenation of ethane over BaF₂-LaOF catalysts 263

Subject Index

Abnormal conditions

Effect of abnormal treatment on the mechanical strength of iron-based high-temperature shift catalyst 293

Acid strength distribution

Catalytic properties of $\text{SO}_4^{2-}/\text{Ti-M-O}$ superacids in esterification 11

Adiponitrile hydrogenation

Monometallic Ni, Co and Ru, and bimetallic NiCr, NiTi and CoFe Ziegler–Sloan–Laporte catalysts for the hydrogenation of adiponitrile into hexamethylenediamine: Effect of water and dopants 367

Aerogel

Catalysts derived from polymer-stabilised colloidal platinum: Effects of support and calcination on the catalytic behaviour in hydrogenation 133

Alkaline earth metals

Carbon dioxide reforming of methane over nickel/alkaline earth metal oxide catalysts 149

Alkene

Catalysts derived from polymer-stabilised colloidal platinum: Effects of support and calcination on the catalytic behaviour in hydrogenation 133

Alkene oxidation

A new highly efficient method for the synthesis of Ti–Beta zeolite oxidation catalyst 185

Alkylation

Ortho-selective methylation of phenol over CeO_2 catalyst 7

Alumina

The role of the nature and the purity of the alumina support on the hydrodesulfurization activity of CoMo sulfides 321

Modifications of Pt/alumina combustion catalysts by barium addition I. Properties of fresh catalysts 351

attrition of

Attrition of precipitated iron Fischer–Tropsch catalysts 335

Automotive catalysts

A SEM-EDS study of new and used automotive catalysts 121

BaF_2 –LaOF catalyst

Oxidative dehydrogenation of ethane over BaF_2 –LaOF catalysts 263

Barium

Effect of the type of support preparation on the thermostability and the oxidation activity of $\text{CeO}_x/\text{BaO}/\text{Al}_2\text{O}_3$ -supported Pd catalysts 59

Barium addition

Modifications of Pt/alumina combustion catalysts by barium addition I. Properties of fresh catalysts 351

Bismuth promoter

Selective catalytic oxidation of glyceric acid to tartronic and hydroxypyruvic acids 179

Carbon dioxide

Comparison of carbon dioxide and carbon monoxide with respect to hydrogenation on Raney ruthenium catalysts 31

Carbon dioxide reforming of methane over nickel/alkaline earth metal oxide catalysts 149

Carbon monoxide

Comparison of carbon dioxide and carbon monoxide with respect to hydrogenation on Raney ruthenium catalysts 31

Carbonylation

High pressure reaction of methanol with CO or $\text{CO} + \text{H}_2$ catalyzed by sulfided CoMo/C 67

Catalyst microstructure

Attrition of precipitated iron Fischer–Tropsch catalysts 335

Catalyst preparation (catalytic reduction/impregnation)

Influence of Pt–Re interaction on activity and selectivity of reforming catalysts 281

Catalytic combustion

Modifications of Pt/alumina combustion catalysts by barium addition I. Properties of fresh catalysts 351

Ceramic

Dense ceramic membranes for partial oxidation of methane to syngas 19

Cerium

An improved acylation of phenol over modified ZSM-5 catalysts 1

Effect of the type of support preparation on the thermostability and the oxidation activity of $\text{CeO}_x/\text{BaO}/\text{Al}_2\text{O}_3$ -supported Pd catalysts 59

Cerium oxide

Ortho-selective methylation of phenol over CeO_2 catalyst 7

Cobalt

An improved acylation of phenol over modified ZSM-5 catalysts 1

Monometallic Ni, Co and Ru, and bimetallic NiCr, NiTi and CoFe Ziegler-Sloan-Laporte catalysts for the hydrogenation of adiponitrile into hexamethylenediamine: Effect of water and dopants 367

Cobalt/molybdenum/carbon

High pressure reaction of methanol with CO or $\text{CO} + \text{H}_2$ catalyzed by sulfided CoMo/C 67

Cobalt-molybdenum sulphide

The role of the nature and the purity of the alumina support on the hydrodesulfurization activity of CoMo sulfides 321

Colloid

Catalysts derived from polymer-stabilised colloidal platinum: Effects of support and calcination on the catalytic behaviour in hydrogenation 133

Copper

An improved acylation of phenol over modified ZSM-5 catalysts 1

Cracking

Catalytic cracking activity and physicochemical properties of REY zeolite mixed with kaolin clay treated by hydrothermal hot pressing method 305

Cyclopentane hydrogenolysis

Influence of Pt-Re interaction on activity and selectivity of reforming catalysts 281

Decyclisation

Competitive reaction of methylcyclohexane and n-hexane over alumina-supported platinum, iridium and ruthenium catalysts 95

Dehydrogenation

Alternative processes for the production of styrene 219

Diethyl phthalate synthesis

Catalytic properties of $\text{SO}_4^{2-}/\text{Ti-M-O}$ superacids in esterification 11

Energy dispersive spectroscopy

A SEM-EDS study of new and used automotive catalysts 121

Esterification

Catalytic properties of $\text{SO}_4^{2-}/\text{Ti-M-O}$ superacids in esterification 11

Ethane

Oxidative dehydrogenation of ethane over BaF_2 -LaOF catalysts 263

Ethylbenzene

Alternative processes for the production of styrene 219

Fischer-Tropsch synthesis

Attrition of precipitated iron Fischer-Tropsch catalysts 335

Fluoride

Promoting effect of F^- on Sr/La oxide catalysts for the oxidative coupling of methane 269

Fluorinated alumina

Influence of alumina fluorination on the dispersion and hydrotreating activity of W/ Al_2O_3 catalysts 103

Fuel cell

Internal steam reforming of methane over Ni-based electrode in solid oxide fuel cells 47

Gasoline

Catalytic cracking activity and physicochemical properties of REY zeolite mixed with kaolin clay treated by hydrothermal hot pressing method 305

Glyceric acid

Selective catalytic oxidation of glyceric acid to tartronic and hydroxypyruvic acids 179

Heterogenisation

Catalysts derived from polymer-stabilised colloidal platinum: Effects of support and calcination on the catalytic behaviour in hydrogenation 133

Hexamethylenediamine

Monometallic Ni, Co and Ru, and bimetallic NiCr, NiTi and CoFe Ziegler-Sloan-Laporte catalysts for the hydrogenation of adiponitrile into hexamethylenediamine: Effect of water and dopants 367

Hexane

Competitive reaction of methylcyclohexane and n-hexane over alumina-supported platinum, iridium and ruthenium catalysts 95

Hydrodesulphurization

The role of the nature and the purity of the alumina support on the hydrodesulfurization activity of CoMo sulfides 321

Hydrogenation

Comparison of carbon dioxide and carbon monoxide with respect to hydrogenation on Raney ruthenium catalysts 31

Catalysts derived from polymer-stabilised colloidal platinum: Effects of support and calcination on the catalytic behaviour in hydrogenation 133

Hydrogen effect

Hydrogen effect on $\alpha\text{-Al}_2\text{O}_3$ supported Ni catalyst for steam methane reforming reaction 241

- Hydrothermal hot pressing
Catalytic cracking activity and physicochemical properties of REY zeolite mixed with kaolin clay treated by hydrothermal hot pressing method 305
- Hydrotreating
Influence of alumina fluoridation on the dispersion and hydrotreating activity of W/Al₂O₃ catalysis 103
- Hydroxypyruvic acid
Selective catalytic oxidation of glyceric acid to tartronic and hydroxypyruvic acids 179
- Immobilisation
Catalysts derived from polymer-stabilised colloidal platinum: Effects of support and calcination on the catalytic behaviour in hydrogenation 133
- Inorganic contaminants distribution
A SEM-EDS study of new and used automotive catalysts 121
- In situ IR spectra
Promoting effect of F⁻ on Sr/La oxide catalysts for the oxidative coupling of methane 269
- Iridium/alumina
Competitive reaction of methylcyclohexane and n-hexane over alumina-supported platinum, iridium and ruthenium catalysts 95
- Iron
Monometallic Ni, Co and Ru, and bimetallic NiCr, NiTi and CoFe Ziegler-Sloan-Laporte catalysts for the hydrogenation of adiponitrile into hexamethylenediamine: Effect of water and dopants 367
- Iron-based catalyst
Effect of abnormal treatment on the mechanical strength of iron-based high-temperature shift catalyst 293
- Jahn-Teller effect
Selective reduction of nitrobenzene to nitrosobenzene over different kinds of trimanganese tetroxide catalysts 81
- Kaolin
Catalytic cracking activity and physicochemical properties of REY zeolite mixed with kaolin clay treated by hydrothermal hot pressing method 305
- Manganese oxide
Selective reduction of nitrobenzene to nitrosobenzene over different kinds of trimanganese tetroxide catalysts 81
- Mechanical strength
Effect of abnormal treatment on the mechanical strength of iron-based high-temperature shift catalyst 293
- Membrane
Dense ceramic membranes for partial oxidation of methane to syngas 19
- Membrane reactor
Alternative processes for the production of styrene 219
- Methane
Comparison of carbon dioxide and carbon monoxide with respect to hydrogenation on Raney ruthenium catalysts 31
Carbon dioxide reforming of methane over nickel/alkaline earth metal oxide catalysts 149
- Methane oxidation
Dense ceramic membranes for partial oxidation of methane to syngas 19
- Methane oxidative coupling
Promoting effect of F⁻ on Sr/La oxide catalysts for the oxidative coupling of methane 269
- Methane steam reforming
Internal steam reforming of methane over Ni-based electrode in solid oxide fuel cells 47
- Methanol
Ortho-selective methylation of phenol over CeO₂ catalyst 7
Comparison of carbon dioxide and carbon monoxide with respect to hydrogenation on Raney ruthenium catalysts 31
High pressure reaction of methanol with CO or CO + H₂ catalyzed by sulfided CoMo/C 67
- Methylcyclohexane
Competitive reaction of methylcyclohexane and n-hexane over alumina-supported platinum, iridium and ruthenium catalysts 95
- Ni
Carbon dioxide reforming of methane over nickel/alkaline earth metal oxide catalysts 149
- Ni/Al₂O₃
Hydrogen effect on α -Al₂O₃ supported Ni catalyst for steam methane reforming reaction 241
- Nickel
Monometallic Ni, Co and Ru, and bimetallic NiCr, NiTi and CoFe Ziegler-Sloan-Laporte catalysts for the hydrogenation of adiponitrile into hexamethylenediamine: Effect of water and dopants 367
- Nickel-based electrode
Internal steam reforming of methane over Ni-based electrode in solid oxide fuel cells 47
- Niobia-alumina
Various reactions catalyzed by niobium compounds and materials 191
- Niobic acid
Various reactions catalyzed by niobium compounds and materials 191
- Niobium layer compounds
Various reactions catalyzed by niobium compounds and materials 191
- Niobium oxide
Various reactions catalyzed by niobium compounds and materials 191

- Niobium phosphate
Various reactions catalyzed by niobium compounds and materials 191
- Nitrobenzene reduction
Selective reduction of nitrobenzene to nitrosobenzene over different kinds of trimanganese tetroxide catalysts 81
- Nitrosobenzene
Selective reduction of nitrobenzene to nitrosobenzene over different kinds of trimanganese tetroxide catalysts 81
- of iron catalysts
Attrition of precipitated iron Fischer-Tropsch catalysts 335
Attrition of precipitated iron Fischer-Tropsch catalysts 335
- Oxidation catalysts
A new highly efficient method for the synthesis of Ti-Beta zeolite oxidation catalyst 185
- Oxidation (selective catalytic)
Selective catalytic oxidation of glyceric acid to tartronic and hydroxypyruvic acids 179
- Oxidative dehydrogenation
Alternative processes for the production of styrene 219
- Oxidative dehydrogenation of ethane
Oxidative dehydrogenation of ethane over BaF_2 -LaOF catalysts 263
- Oxygen adspecies
Promoting effect of F^- on Sr/La oxide catalysts for the oxidative coupling of methane 269
- Palladium
Effect of the type of support preparation on the thermostability and the oxidation activity of $\text{CeO}_x/\text{BaO}/\text{Al}_2\text{O}_3$ -supported Pd catalysts 59
- Phenol
Ortho-selective methylation of phenol over CeO_2 catalyst 7
- Phenol acylation
An improved acylation of phenol over modified ZSM-5 catalysts 1
- Phenol hydroxylation
A new highly efficient method for the synthesis of Ti-Beta zeolite oxidation catalyst 185
- Platinum
Catalysts derived from polymer-stabilised colloidal platinum: Effects of support and calcination on the catalytic behaviour in hydrogenation 133
Selective catalytic oxidation of glyceric acid to tartronic and hydroxypyruvic acids 179
Modifications of Pt/alumina combustion catalysts by barium addition I. Properties of fresh catalysts 351
- Platinum/alumina
Competitive reaction of methylcyclohexane and n-hexane over alumina-supported platinum, iridium and ruthenium catalysts 95
- Platinum-rhenium/alumina
Influence of Pt-Re interaction on activity and selectivity of reforming catalysts 281
- Precipitated iron catalysts
Attrition of precipitated iron Fischer-Tropsch catalysts 335
- Raney
Comparison of carbon dioxide and carbon monoxide with respect to hydrogenation on Raney ruthenium catalysts 31
- Reforming
Carbon dioxide reforming of methane over nickel/alkaline earth metal oxide catalysts 149
- Rejuvenation
A SEM-EDS study of new and used automotive catalysts 121
- REY zeolite
Catalytic cracking activity and physicochemical properties of REY zeolite mixed with kaolin clay treated by hydrothermal hot pressing method 305
- Ruthenium
Comparison of carbon dioxide and carbon monoxide with respect to hydrogenation on Raney ruthenium catalysts 31
Monometallic Ni, Co and Ru, and bimetallic NiCr, NiTi and CoFe Ziegler-Sloan-Laporte catalysts for the hydrogenation of adiponitrile into hexamethylenediamine: Effect of water and dopants 367
- Ruthenium/alumina
Competitive reaction of methylcyclohexane and n-hexane over alumina-supported platinum, iridium and ruthenium catalysts 95
- Scanning electron microscopy
A SEM-EDS study of new and used automotive catalysts 121
Attrition of precipitated iron Fischer-Tropsch catalysts 335
- Sintering
Hydrogen effect on α - Al_2O_3 supported Ni catalyst for steam methane reforming reaction 241
- Sol
Catalysts derived from polymer-stabilised colloidal platinum: Effects of support and calcination on the catalytic behaviour in hydrogenation 133
- Sol-gel
Effect of the type of support preparation on the thermostability and the oxidation activity of $\text{CeO}_x/\text{BaO}/\text{Al}_2\text{O}_3$ -supported Pd catalysts 59
- Solid oxide fuel cell
Internal steam reforming of methane over Ni-based electrode in solid oxide fuel cells 47

- Solid superacids
Catalytic properties of $\text{SO}_4^{2-}/\text{Ti-M-O}$ superacids in esterification 11
- Steam methane reforming
Hydrogen effect on $\alpha\text{-Al}_2\text{O}_3$ supported Ni catalyst for steam methane reforming reaction 241
- Styrene
Alternative processes for the production of styrene 219
- Sulfidation
High pressure reaction of methanol with CO or CO + H_2 catalyzed by sulfided CoMo/C 67
Influence of Pt-Re interaction on activity and selectivity of reforming catalysts 281
- Support
Effect of the type of support preparation on the thermostability and the oxidation activity of $\text{CeO}_x/\text{BaO}/\text{Al}_2\text{O}_3$ -supported Pd catalysts 59
- Syngas
Dense ceramic membranes for partial oxidation of methane to syngas 19
- Tartronic acid
Selective catalytic oxidation of glyceric acid to tartronic and hydroxypyruvic acids 179
- Temperature-programmed desorption
Carbon dioxide reforming of methane over nickel/alkaline earth metal oxide catalysts 149
- Thermostability
Effect of the type of support preparation on the thermostability and the oxidation activity of $\text{CeO}_x/\text{BaO}/\text{Al}_2\text{O}_3$ -supported Pd catalysts 59
- Titania-silica cogels
A new highly efficient method for the synthesis of Ti-Beta zeolite oxidation catalyst 185
- Titanium
Monometallic Ni, Co and Ru, and bimetallic NiCr, NiTi and CoFe Ziegler-Sloan-Laporte catalysts for the hydrogenation of adiponitrile into hexamethylenediamine: Effect of water and dopants 367
- Titanium beta synthesis
A new highly efficient method for the synthesis of Ti-Beta zeolite oxidation catalyst 185
- Transmission electron microscopy
Influence of alumina fluoridation on the dispersion and hydrotreating activity of W/ Al_2O_3 catalysis 103
Attrition of precipitated iron Fischer-Tropsch catalysts 335
- Tungsten sulphide
Influence of alumina fluoridation on the dispersion and hydrotreating activity of W/ Al_2O_3 catalysis 103
- Vanadia-niobia
Various reactions catalyzed by niobium compounds and materials 191
- Water
Monometallic Ni, Co and Ru, and bimetallic NiCr, NiTi and CoFe Ziegler-Sloan-Laporte catalysts for the hydrogenation of adiponitrile into hexamethylenediamine: Effect of water and dopants 367
- Water-gas shift
Effect of abnormal treatment on the mechanical strength of iron-based high-temperature shift catalyst 293
- Weibull statistics
Effect of abnormal treatment on the mechanical strength of iron-based high-temperature shift catalyst 293
- Zeolites
An improved acylation of phenol over modified ZSM-5 catalysts 1
- Ziegler-Sloan-Laporte
Monometallic Ni, Co and Ru, and bimetallic NiCr, NiTi and CoFe Ziegler-Sloan-Laporte catalysts for the hydrogenation of adiponitrile into hexamethylenediamine: Effect of water and dopants 367
- ZSM-5
An improved acylation of phenol over modified ZSM-5 catalysts 1

Catalytic cracking activity and physicochemical properties of REY zeolite mixed with kaolin clay treated by hydrothermal hot pressing method 305
